# Assessment Portal Report

*"If you have knowledge, let others light  
their candles in it."*

*-Margret Fuller*

Several thin, dark blue wavy lines originate from the bottom left and curve upwards and to the right.

## **Introduction**

We all know, knowledge is the currency of 21<sup>st</sup> century. However, sometimes it is important to think over “How to make education better and more efficient?” In today’s digital world, everyone is influenced more and more towards entertainment, but as a result it becomes an issue for poor results of students. Technology is hardly used for the betterment of the society It only happens in rare cases that parents are aware of the students each and every activity. Many a times, lack of education is mainly caused as the students’ parents are not aware of the current academic progress of their children. However, it is the moral duty that parents should know about their children’s result.

## **Scope**

- Our project is limited only for school purpose. We are just focussing on primary education purpose in order to make sure that students don’t get misguided from their future due to lack of awareness to their parents.

## Purpose

## Parents Side Problems

- In the existing portal, in which we learn online this days are not good enough to show progress/improvement to our parents.
- Which is very important because they are stake holders for our life and they have right to know where their investment goes.
- In which activity or project they are participating ?
- What assignment or work is given by instructor to them and are they completing it ?
- How was there performance in quiz test at the end of course ?
- In which field they are best and which field they require improvement ?
- In which company my son/daughter can be placed ?

## **Student Side Problems**

- As student problem is to learn self-study.
- Availability of resources at all the time.(resources in terms of books, teacher and reference material)
- What if I am a slow learner ?
- How can we know our limitations in different fields ?
- How to prepare our self to place in particular field ?
- Where to go for internships ?
- Where to go for expert workshops, seminars, lectures etc ?
